Price:	\$120,000	\$/Titled Acres:	\$1,000
Farmland:	\$120,000	P/AV Multiple:	1.04
Enterprise:	Hay (arable), Pasture		

Description

100 Acres of Hay/Pasture – Village of Meacham

Located in east-central Saskatchewan on the **north side of the Village of Meacham, approximately 60km east of Saskatoon**, this **2-parcel package** (NW 23-36-27-W2, Ext 4 & 5) offers a mix of cultivated and native grassland with wetland habitat. This **Ducks Unlimited Canada land** presents a unique opportunity for conservation-minded buyers and farmers in the area.

Conservation Program Details: This property is being sold under the **Ducks Unlimited Canada Revolving Land Conservation Program**, with a purpose of restoring and conserving wetlands and grasslands.

A conservation easement will be registered on title, preserving the wetland and grassland habitat. Haying and grazing are permitted uses, and the tame grass acres may be periodically broken and reseeded to perennial forage for weed control and stand rejuvenation — once every 10 years, with a 2-year window to reseed.

Property Details:

- **Total Acres:** 100.36 acres (ISC)
- **Cultivated Acres:** 51 acres (as per SAMA)
- **Native Grass:** 50 acres (as per SAMA)
- **Soil Association:** Elstow Clay
- **Topography:** Flat
- **Features:** Village of Meacham and Highway 2 frontage

The Ducks Unlimited habitat plan identifies the following land designations for the purpose of the conservation easement:

- **Wetland:** 26.2 acres
- **Tame Grass/Forage:** 59.9 acres

SAMA Information

This information is collected from Saskatchewan Assessment Management Agency via field sheets on each individual parcel. It includes specific information such as: assessed value, uses of soil (cultivated, arable, pasture, wetlands, etc), number of acres for each use, soil profile information including association & texture, topography, stones, salinity and soil final rating.

Soil Final Rating

The final rating (FR) is the productivity rating for the acres adjusted for economic factors that affect the average cost of production for specified features. The economic factors include stones, topography, natural hazards, man-made hazards, tree cover and miles to market. The final rating units are index points per acre. Soils are given a rating from 100 (best) to 0 (worst). Soils with a final rating under 30 are marginal and rarely cropped.

Saskatchewan Crop Insurance Corporation (SCIC)

SCIC gives a class rating to every quarter section in Saskatchewan to reflect its productivity. Ratings range from Class A (best) to Class P (worst). There are 23 different risk zones in Saskatchewan. Please note a class B rating in risk zone 3 does not necessarily have the same productive capacity as a class B rating in risk zone 16.
