Cultivated Acres:	292	Soil Final Rating:	52.59
Price:	\$1,650,000	\$/Titled Acres:	\$5,183.63
Avg AV/Qtr:	\$289,705	Farmland:	\$1,650,000
P/AV Multiple:	2.86		
Enterprise:	Grain		

Description

South of Fillmore in the RM of Griffin No. 66, the Kosior property includes 318.31 titled acres across two quarters and an established farmyard. SAMA reports 292 cultivated acres with Trossachs and Tuxford clay soils and a weighted soil final rating of 52.59.

Mature trees shelter the yard, which includes a 1080 square feet bungalow with maintenance free steel siding and a covered deck, an approximately 402 × 902 shop with a 402 × 372 insulated, natural-gas-heated section, a 242 × 602 storage shed and approximately 15,000 bushels of aerated flat-bottom grain storage. Services include power, natural gas, a 2,400-gallon drinking-water cistern and two dugouts.

Fillmore at just 15kms northwest and Weyburn 48kms southwest both offer groceries, banking, dining, Kindergarten to Grade 12 school, childcare and health care services. And surrounding wetlands and fields attract migratory birds and provide wildlife-viewing and hunting opportunities.

With productive farmland and a sheltered yard, the property offers an opportunity to expand a farm or establish a rural home base.

SAMA Information

This information is collected from Saskatchewan Assessment Management Agency via field sheets on each individual parcel. It includes specific information such as: assessed value, uses of soil (cultivated, arable, pasture, wetlands, etc), number of acres for each use, soil profile information including association & texture, topography, stones, salinity and soil final rating.

Soil Final Rating

The final rating (FR) is the productivity rating for the acres adjusted for economic factors that affect the average cost of production for specified features. The economic factors include stones, topography, natural hazards, man-made hazards, tree cover and miles to market. The final rating units are index points per acre. Soils are given a rating from 100 (best) to 0 (worst). Soils with a final rating under 30 are marginal and rarely cropped.

Saskatchewan Crop Insurance Corporation (SCIC)

SCIC gives a class rating to every quarter section in Saskatchewan to reflect its productivity. Ratings range from Class A (best) to Class P (worst). There are 23 different risk zones in Saskatchewan. Please note a class B rating in risk zone 3 does not necessarily have the same productive capacity as a class B rating in risk zone 16.
