Quarter Section with Extensive Infrastructure – South of Regina

Located just minutes south of Regina, this unique quarter section offers a rare combination of productive Regina heavy clay farmland and an exceptionally well-developed yard site with extensive buildings and services. Originally purpose-built for agricultural research and livestock operations, the property now presents an outstanding opportunity for buyers seeking substantial infrastructure adaptable to a variety of uses.

Approximately 87 acres are currently cultivated, with the balance in pasture, pens, and a mature, sheltered yard site. The improvements include a residence, multiple large shops and storage buildings, office space, livestock barns, and covered shelters—providing flexibility for agricultural operations, equipment storage, light industrial or commercial use, hobby farming, or a rural lifestyle property with significant on-site capabilities.

The scale and quality of the improvements would be difficult and costly to replicate today, making this property particularly attractive to buyers looking to repurpose existing infrastructure rather than build from the ground up. With close proximity to Regina, strong access, and versatile land use potential, this property represents a compelling acreage opportunity for those with vision and practical needs.

Annual Property Taxes: If the property was classified as Agricultural, taxes are estimated at approximately \$3,000. Buyers to confirm assessment and taxation details with the Rural Municipality.

SAMA Information

This information is collected from Saskatchewan Assessment Management Agency via field sheets on each individual parcel. It includes specific information such as: assessed value, uses of soil (cultivated, arable, pasture, wetlands, etc), number of acres for each use, soil profile information including association & texture, topography, stones, salinity and soil final rating.

Soil Final Rating

The final rating (FR) is the productivity rating for the acres adjusted for economic factors that affect the average cost of production for specified features. The economic factors include stones, topography, natural hazards, man-made hazards, tree cover and miles to market. The final rating units are index points per acre. Soils are given a rating from 100 (best) to 0 (worst). Soils with a final rating under 30 are marginal and rarely cropped.

<https://www.sama.sk.ca/property-owner-services/detailed-property-information>

Saskatchewan Crop Insurance Corporation (SCIC)

SCIC gives a class rating to every quarter section in Saskatchewan to reflect its productivity. Ratings range from Class A (best) to Class P (worst). There are 23 different risk zones in Saskatchewan. Please note a class B rating in risk zone 3 does not necessarily have the same productive capacity as a class B rating in risk zone 16.
