### **Prime Development Land near Pangman, SK**

Located just southeast of Pangman, adjacent to Highway 6, this property offers a rare combination of location, water quality, and development potential. The water well is owned by the RM.

With approximately 156 cultivated acres (as per owner), this parcel is ideally suited for a business venture, country residential acreage, or agricultural development. Its highway frontage ensures easy access, visibility, and versatility for a range of potential projects.

Whether you're investing in your next enterprise or planning your dream home in the country, this land is a standout opportunity in southern Saskatchewan.

The 14 quarters (SK996977) the seller owns to west (SE 20, NW 21, NE 21, NE 22, SW 28, SE 29, NE 29, NE 31, NE 32, NW 32, NE 33, NW 33 all 7-20 W2, and SW 3 & SE 4 all 8-20 W2) must sell first.

### SAMA Information

This information is collected from Saskatchewan Assessment Management Agency via field sheets on each individual parcel. It includes specific information such as: assessed value, uses of soil (cultivated, arable, pasture, wetlands, etc), number of acres for each use, soil profile information including association & texture, topography, stones, salinity and soil final rating.

### Soil Final Rating

The final rating (FR) is the productivity rating for the acres adjusted for economic factors that affect the average cost of production for specified features. The economic factors include stones, topography, natural hazards, man-made hazards, tree cover and miles to market. The final rating units are index points per acre. Soils are given a rating from 100 (best) to 0 (worst). Soils with a final rating under 30 are marginal and rarely cropped.

### Saskatchewan Crop Insurance Corporation (SCIC)

SCIC gives a class rating to every quarter section in Saskatchewan to reflect its productivity. Ratings range from Class A (best) to Class P (worst). There are 23 different risk zones in Saskatchewan. Please note a class B rating in risk zone 3 does not necessarily have the same productive capacity as a class B rating in risk zone 16.
