Rare riverfront land offering a unique combination of strong agricultural use, natural beauty, and long-term potential.

The property features cultivated farmland that supports reliable production, complemented by a riverfront/wildland section that provides scenic views, natural habitat, and recreational appeal. This balance makes the property attractive both to farm operators looking to expand and to lifestyle buyers seeking a distinctive setting along the river.

An additional advantage is the irrigation potential: the farmland immediately north is currently irrigated, highlighting the opportunity for future water development and adding further strength to the long-term agricultural viability of the property.

Altogether, this is more than just farmland — it is a rare riverfront holding that combines productivity, lifestyle appeal, and unique character.

Farmland & Price Summary

1 parcel
85 title acres (ISC)

SAMA Information

81 total acres
50 cultivated acres
31 wetland/bush acres
\$88,900 total 2025 assessed value (AV)
\$175,605 average assessment per 160 acres
47.1 soil final rating (weighted average)

\$450,000 Farmland Price
\$5,289 per title acre (ISC)
\$9,000 per cultivated acre (SAMA)
5.06 times the 2025 assessed value (P/AV multiple)

Average per 160 acres \$175,605

SAMA Information

This information is collected from Saskatchewan Assessment Management Agency via field sheets on each individual parcel. It includes specific information such as: assessed value, uses of soil (cultivated, arable, pasture, wetlands, etc), number of acres for each use, soil profile information including association & texture, topography, stones, salinity and soil final rating.

Soil Final Rating

The final rating (FR) is the productivity rating for the acres adjusted for economic factors that affect the average cost of production for specified features. The economic factors include stones, topography, natural hazards, man-made hazards, tree cover and miles to market. The final rating units are index points per acre. Soils are given a rating from 100 (best) to 0 (worst). Soils with a final rating under 30 are marginal and rarely cropped.

Saskatchewan Crop Insurance Corporation (SCIC)

SCIC gives a class rating to every quarter section in Saskatchewan to reflect its productivity. Ratings range from Class A (best) to Class P (worst). There are 23 different risk zones in Saskatchewan. Please note a class B rating in risk zone 3 does not necessarily have the same productive capacity as a class B rating in risk zone 16.
