Description

Primate 459 Acres Grain Farmland – RM of Eye Hill No. 382

The grain farmland is comprised of a combination of soil textures of loam, light loam and clay. SAMA indicates that there are 335 cultivated acres, and 124 acres of wetland/bush.

Located just south of the intersection of Highways 31 and 317 near Primate, this 459-acre grain quarter sections offers an excellent opportunity to expand your farming operation or add to your investment portfolio.

The land has been managed under TCO Cert certified organic practices, making it an attractive option for producers seeking land with an established organic management history. Whether you are an existing organic producer looking to expand or a conventional operator interested in transitioning acreage, this quarter presents excellent potential.

With productive grain land, a strong agricultural location, and easy access to nearby communities, this property offers versatility for a variety of farming operations.

Directions: From the intersection of Highway 31 and Highway 317, travel approximately ½ km south on Highway 317. The land is located on the west side of the road

SAMA Information

This information is collected from Saskatchewan Assessment Management Agency via field sheets on each individual parcel. It includes specific information such as: assessed value, uses of soil (cultivated, arable, pasture, wetlands, etc), number of acres for each use, soil profile information including association & texture, topography, stones, salinity and soil final rating.

Soil Final Rating

The final rating (FR) is the productivity rating for the acres adjusted for economic factors that affect the average cost of production for specified features. The economic factors include stones, topography, natural hazards, man-made hazards, tree cover and miles to market. The final rating units are index points per acre. Soils are given a rating from 100 (best) to 0 (worst). Soils with a final rating under 30 are marginal and rarely cropped.

Saskatchewan Crop Insurance Corporation (SCIC)

SCIC gives a class rating to every quarter section in Saskatchewan to reflect its productivity. Ratings range from Class A (best) to Class P (worst). There are 23 different risk zones in Saskatchewan. Please note a class B rating in risk zone 3 does not necessarily have the same productive capacity as a class B rating in risk zone 16.
