Description

IMPORTANT: Viewings are by appointment only and made in advance. Please **do not attend the property unannounced** — this is an active farming operation and staff on site are not authorized to provide tours. To arrange a viewing, contact your Realtor or Hammond Realty, and a member of our team will accompany you on site. Thank you.

Farmland

Regina Northeast sits in the heart of the Regina Plains, spanning RMs Lajord No. 128, Edenwold No. 158, and a handful of quarters in RM Bratt's Creek No. 129 — some of Saskatchewan's most consistently productive heavy clay country. The dominant soil association throughout is Regina Heavy Clay, a dense, moisture-retentive soil that rewards management and delivers reliable yields of wheat, canola, and lentils in a normal crop year. The package totals 16,067.0 ISC title acres with 16,025 cultivated acres, and carries a 2025 SAMA weighted average Soil Final Rating of 72.2 points per acre and an average assessed fair value of \$430,638 per 160 acres. The majority of quarters carry B and C SCIC crop insurance classifications in Risk Zone 8, reflecting the productivity of heavy clay soils in this region — strong in good years, with the moisture-holding capacity that often sees these fields outperform lighter soils in dry conditions. Two developed yard sites anchoring the package add grain storage, fertilizer handling capacity, and shop infrastructure that make this a true operational unit — 100 quarters of Regina Plains farmland being offered together for the first time.

Select the **Farmland** tab above for a complete list of legal land descriptions.

Buildings and Improvements

This property is anchored by two developed yard sites in RM Lajord No. 128, providing the grain storage, fertilizer handling, and shop infrastructure needed to support a large-scale cropping operation across the Regina Plains. The primary headquarters at SE-35 & NE-26-15-18-W2 is a fully equipped 10-acre site featuring a heated and lined shop

with on-site staff accommodation, equipment storage, and significant flat-bottom grain capacity. The secondary site at NE-20-15-18-W2 adds a further 5 acres of yard with a large cold-storage shop and quonset, backed by one of the most diverse fertilizer storage inventories in the portfolio — over 1,400 tonnes of hopper capacity across multiple bin makes and sizes. Together, the two sites deliver an estimated 450,000 bushels of grain storage and approximately 2,268 tonnes of fertilizer capacity to support the full 100-quarter package.

- Two developed yard sites totalling 15 acres with graded gravel bases
- Primary headquarters shop: 80' × 120' wood frame on concrete foundation, lined, heated, with office, staff room, mezzanine storage, and 2-bedroom suite
- Secondary shop: 50' × 120' cold storage with steel-clad wood truss construction
- Quonset storage at both sites: 4,800 sq. ft. (SE-35 & NE-26) and 7,840 sq. ft. (NE-20)
- Storage barn at primary site: 40' × 74' steel frame, steel-clad exterior, gravel base
- Estimated combined grain storage capacity: ±450,000 bu across flat-bottom and hopper bins
- Estimated combined fertilizer capacity: ±2,268 tonnes across hopper bins at both sites
- 6 × Westeel 25,000 bu flat-bottom bins on concrete at primary site
- 4 × Westeel 212T 1825F fertilizer hopper bins on concrete with aeration at primary site
- 15-bin fertilizer and grain storage array at secondary site, including Westeel, Behlen, Meridian, and Friesen makes
- 5 × Westeel 25,000 bu flat-bottom bins on concrete with aeration at secondary site
- All buildings reported in good condition; effective age 20 years at primary site

Select the **Improvements** tab above for a complete description of the improvements.

This property is one of 19 listings offered as part of the Monette Farms Ltd. portfolio — a once-in-a-generation opportunity to acquire prime Saskatchewan farmland across seven regions. Farmland of this calibre, in this quantity, rarely comes to market — and when it does, it doesn't remain available for long. Whether you're looking to add a single quarter or grow your enterprise with a significant land acquisition, parcels within this listing may be available for individual purchase.

If any of this land fits your plans, ***make a strong offer and make it early***. A compelling offer can be accepted ahead of the deadline — the right deal doesn't have to wait.

Average per 160 acres \$430,638

SAMA Information

This information is collected from Saskatchewan Assessment Management Agency via field sheets on each individual parcel. It includes specific information such as: assessed value, uses of soil (cultivated, arable, pasture, wetlands, etc), number of acres for each use, soil profile information including association & texture, topography, stones, salinity and soil final rating.

Soil Final Rating

The final rating (FR) is the productivity rating for the acres adjusted for economic factors that affect the average cost of production for specified features. The economic factors include stones, topography, natural hazards, man-made hazards, tree cover and miles to market. The final rating units are index points per acre. Soils are given a rating from 100 (best) to 0 (worst). Soils with a final rating under 30 are marginal and rarely cropped.

Saskatchewan Crop Insurance Corporation (SCIC)

SCIC gives a class rating to every quarter section in Saskatchewan to reflect its productivity. Ratings range from Class A (best) to Class P (worst). There are 23 different risk zones in Saskatchewan. Please note a class B rating in risk zone 3 does not necessarily have the same productive capacity as a class B rating in risk zone 16.

MONETTE FARMS LTD.

REGINA NORTHEAST · YARD SITES & IMPROVEMENTS · RM Lajord No. 128

Package 1 · Two developed yard sites · NE-20-15-18-W2 and SE-35 & NE-26-15-18-W2

SITE SERVICES & YARD

Yard Site 1 — NE-20-15-18-W2 (5 acres)

- 5-acre developed yard site with graded gravel base
- Grain and fertilizer storage

Yard Site 2 — SE-35 & NE-26-15-18-W2 (10 acres)

- 10-acre developed yard site with graded gravel base spanning two quarter sections
- Primary operational headquarters for the Regina Northeast package
- Grain and fertilizer storage

BUILDINGS

Yard Site 1 — NE-20-15-18-W2

Shop (50' × 120' | 6,000 sq. ft.)

- Wood frame construction with steel-clad wood truss roof and coloured steel walls
- Cold storage configuration; gravel base floor
- Effective age 20–30 years; good condition

Quonset (56' × 140' | 7,840 sq. ft.)

- Steel arch frame structure with gravel base
- Sliding doors in gable end
- No lighting or electrical service observed; average condition

Yard Site 2 — SE-35 & NE-26-15-18-W2

Shop (80' × 120' | 9,600 sq. ft.)

- Wood frame on concrete foundation; coloured steel wall and roof cladding
- Interior lined with coloured steel; tube heating and lighting throughout
- Office and staff room with mezzanine storage
- 2-bedroom suite with bathroom and kitchen
- Effective age 20 years; good condition

Quonset (40' × 120' | 4,800 sq. ft.)

- Steel frame structure on gravel base; unheated; used for equipment storage
- Good condition; effective age 20 years

Storage Barn (40' × 74' | 2,960 sq. ft.)

- Steel frame construction; steel-clad exterior and roof; gravel base interior
- Good condition; effective age 20 years

GRAIN & FERTILIZER STORAGE

Yard Site 1 — NE-20-15-18-W2
